

## List of poster presentations

---

1. **Antolini, Francesco**  
*Quantum dots synthesis through direct laser patterning*
2. **Brumme, Thomas**  
*Electrochemical doping of HfNCl: spin-orbit coupling, spin texture, and Ising superconductivity*
3. **Cabrera Granado, Eduardo**  
*Upconversion-Gold hybrid nanosystems for oligonucleotide detection based on Foerster energy resonant transference*
4. **Chand, Ram**  
*Study of shear and flow of soft amorphous materials*
5. **Dhamo, Lorena**  
*Synthesis and optical characterization of ternary AlS/ZnS quantum dots*
6. **Díaz García, Elena**  
*FRET distance dependency in nanoassemblies based on upconversion nanoparticles and quantum dots*
7. **Dorfs, Dirk**  
*Alternative plasmonic materials – colloid chemical synthesis, characterization and properties*
8. **Dubavik, Aliaksei**  
*Composite materials from RGB carbon dots*
9. **Georgi, Maximilian**  
*(Bi-)metallic aerogels as electrocatalysts – promising materials for green future technologies*
10. **Golovatenko, Aleksandr**  
*Theory of single- and many-particle states in graded CdZnSe nanocrystals*

11. **Gromova, Yulia**  
*Investigation of semiconductor nanocrystals by MCD spectroscopy*
- 12.
13. **Guhrenz, Chris**  
*Versatile Tri(pyrazolyl)phosphanes – phosphorus precursors for the synthesis of highly emitting InP/ZnS nanocrystals*
14. **Hiekel, Karl**  
*Influencing noble metal aerogel structures*
15. **Klemmed, Benjamin**  
*Gold nanorods - metal oxide gel composites as SERS-substrates*
16. **Lengers, Frank**  
*Effects of Coulomb interaction on wave packet dynamics in semiconductor heterostructures*
17. **Miao, Shiding**  
*Stabilization of highly expansive black cotton soils by means of geopolymerization*
18. **Nandi, Mahasweta**  
*New generation electrode materials from porous carbon of bacterial cellulose/polyacrylonitrile composite*
19. **Rosebrock, Marina**  
*Multicomponent gel networks of nanoparticles for photoelectrochemical applications*
20. **Rusch, Pascal**  
*Silica shell growth around CdSe/CdS nanorod aerogels*
21. **Trotsiuk, Liudmila**  
*The effect of gold nanorods on luminescence of quantum dots in electrostatic complexes*
