

VI. Frustrated systems

- 61 Walter Apel *Spatially anisotropic Heisenberg antiferromagnet on the Kagomé lattice*
- 62 Marcelo José Fabián Arlego *Series expansion analysis of frustrated two-dimensional quantum spin systems*
- 63 Oliver Rösch *Quantum phase transitions and dimensional reduction in frustrated magnets*
- 64 Ronald Zinke *Spiral phases in frustrated quasi-one-dimensional quantum spin systems*
- 65 Christian Brünger *Groundstate properties of a spiral staircase model*
- 66 Tobias Förster *ESR and NMR on the frustrated square lattice ferromagnet $\text{SrZnVO}(\text{PO}_4)_2$*
- 67 Torsten Rudolf *Spin-phonon coupling in chromium spinels probed by infrared spectroscopy*
- 68 Ute Löw *$\text{InCu}_{2/3}\text{V}_{1/3}\text{O}_3$ und das Heisenberg-Modell auf dem Honeycomb-Gitter*
