Prof. Anatoly Larkin is celebrating his 70th birthday on October 14, 2002.

This occasion is used for organizing a conference on "Progress in Condensed Matter Theory".
Both formal presentations and informal discussions are planned on the whole broad scope of problems Anatoly Larkin used to work on.
This will include:

1. Superconductivity, magnetism and strongly correlated electron systems
2. Disordered systems
3. Mesoscopics and nanoscience
4. Spin glasses
5. Quantum Hall effect
